PREFACE

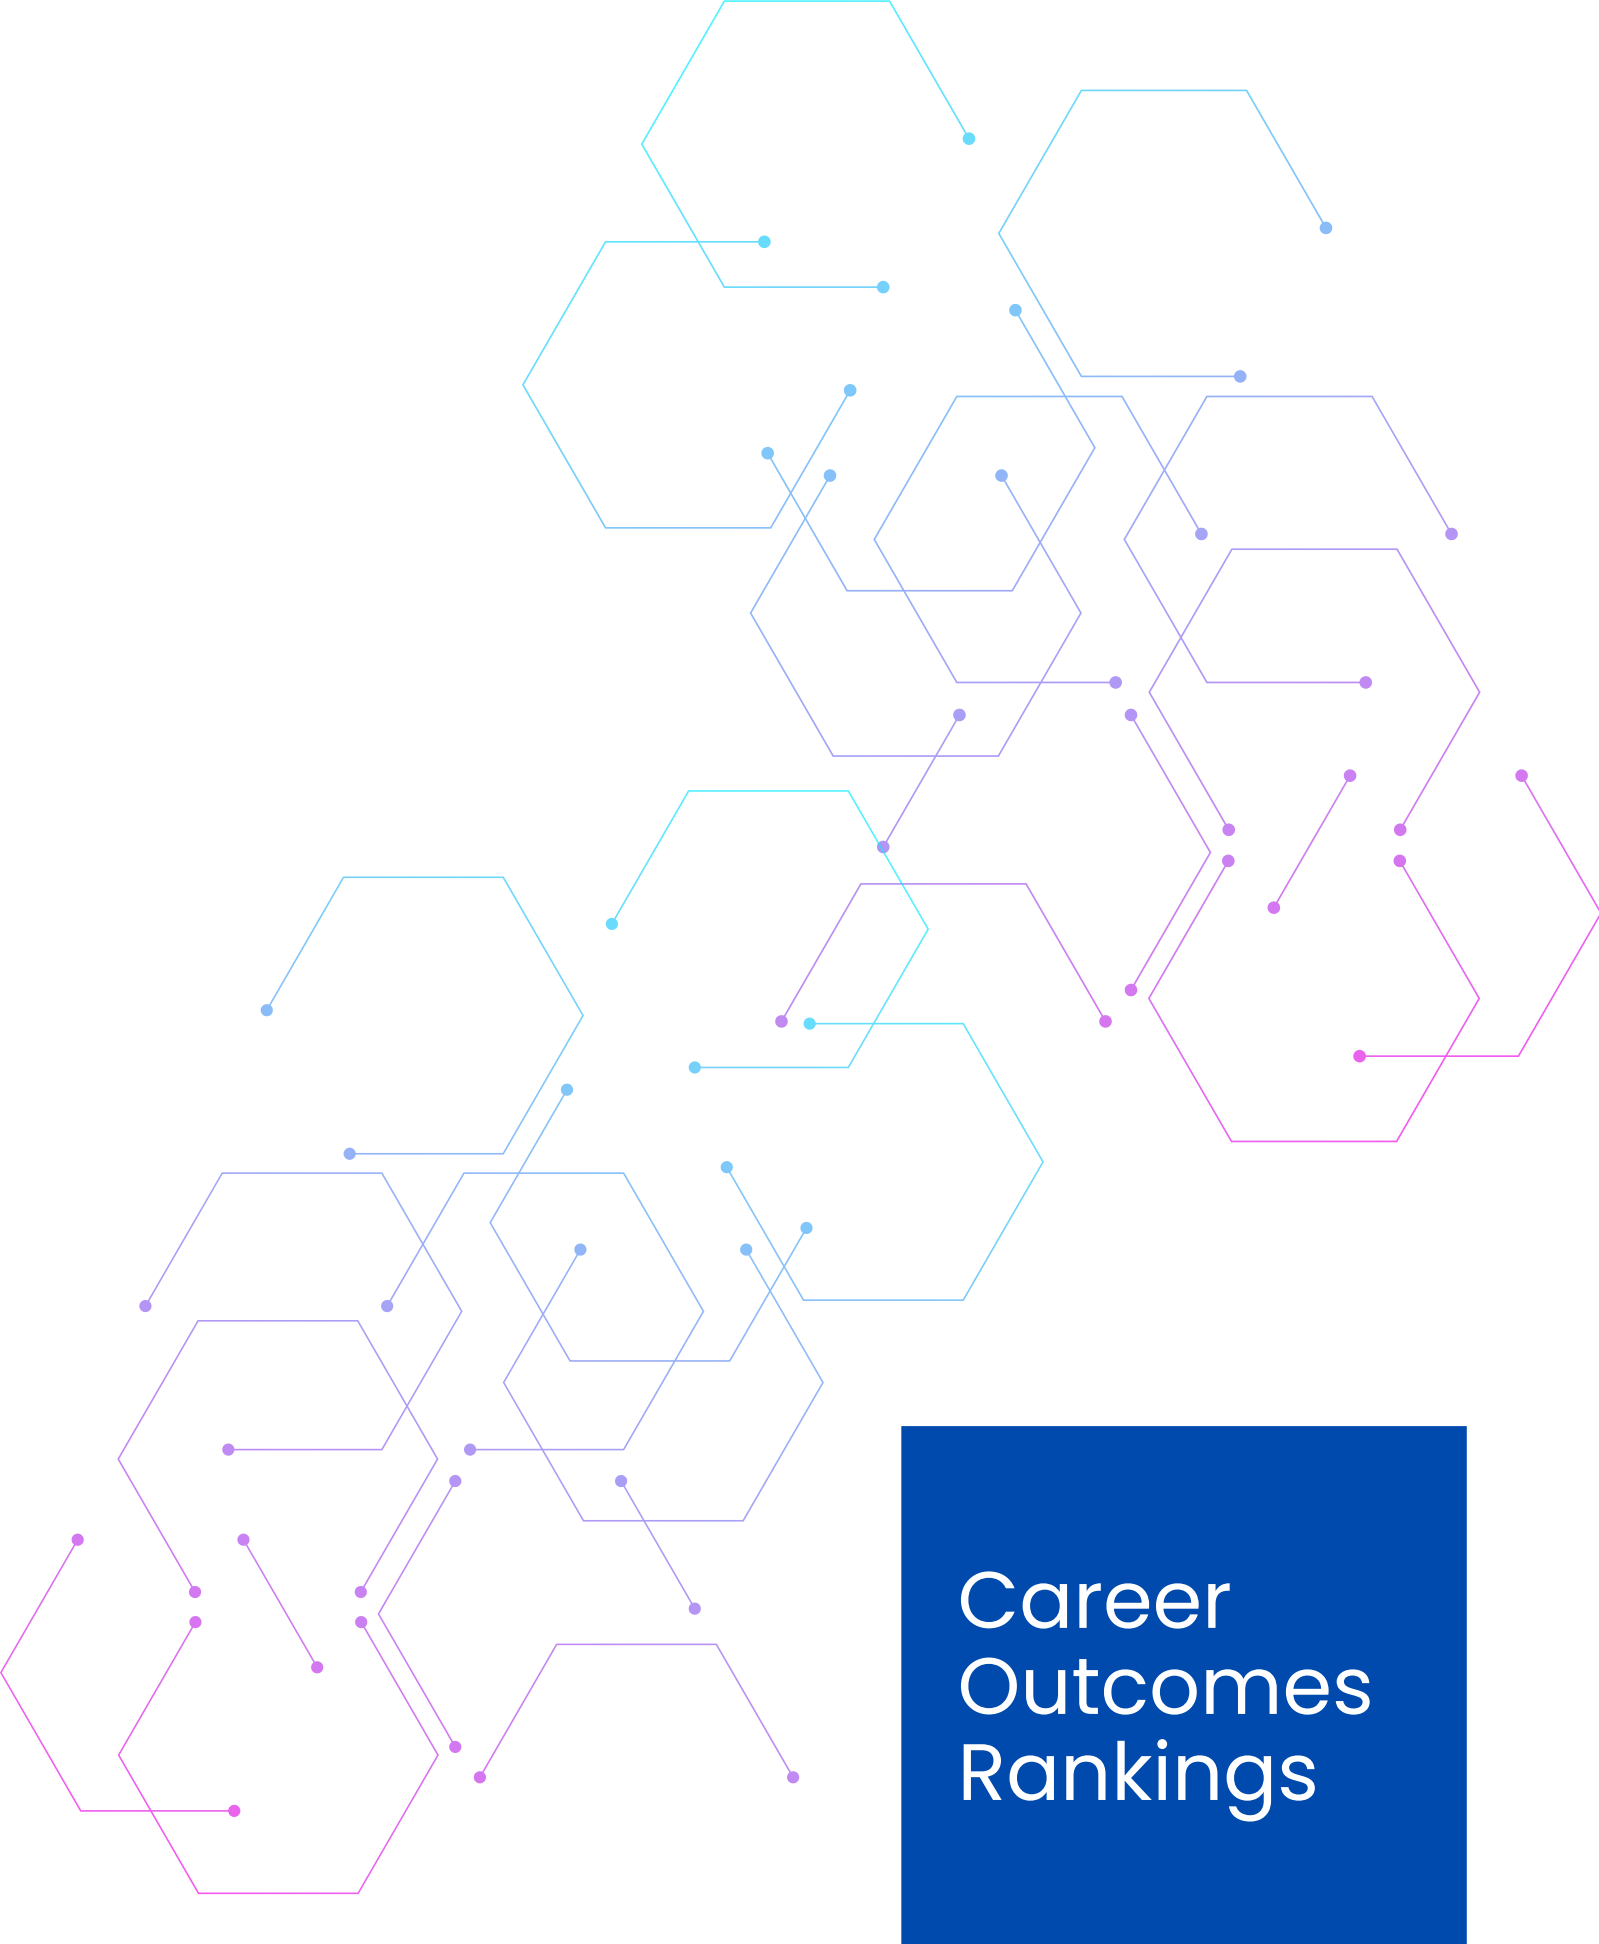

The Graduate Career Outcomes Rankings 2026, published by GU World Rankings, presents a focused evaluation of how universities and higher education institutions are preparing graduates for meaningful careers, employability, professional growth, and long-term workplace success. In a rapidly changing global economy, the value of higher education is increasingly measured not only by academic delivery, but also by the outcomes it creates for students after graduation.

This ranking release document reflects GU World Rankings' commitment to recognising institutions that demonstrate strong graduate employability, industry readiness, career progression, alumni achievements, employer confidence, and student career satisfaction. The rankings aim to provide students, parents, institutions, employers, and policy stakeholders with a reliable perspective on how effectively institutions translate learning into opportunity.

The 2026 edition places particular emphasis on evidence-based assessment, transparent indicators, and career-linked institutional performance. It celebrates universities that are building employability ecosystems through relevant curricula, internships, skill development, industry partnerships, entrepreneurship support, and alumni engagement.

We hope this ranking serves as a meaningful reference for institutional benchmarking, strategic improvement, and informed decision-making. GU World Rankings congratulates all participating and featured institutions for their continued contribution to strengthening graduate futures and advancing the global conversation on career outcomes in higher education.
